# Portable HID Underwater Fishing Light

These HID systems are energy efficient, drawing just over 2 amps, and will run for hours on a standard 12v boat or car battery when plugged into an approved 1000w Inverter. Of course the unit can also be used with just about any 110v generator, or standard GFI outlet at any dock, pier or marina.

# INSTRUCTIONS:

These HID systems are energy efficient, drawing just over 2 amps, and will run for hours on a standard 12v boat or car battery when plugged into an approved 1000w Inverter. Of course the unit can also be used with just about any 110v generator.

## Easy to Transport, Use, and Clean

Set up and cleaning are a breeze, and transportation and storage is made easy by our fully sealed, durable hard plastic marine container. Our sturdy purpose-built storage container protects your system from rough off-shore conditions and bad weather.

## Rugged and Durable Construction For Inshore or Offshore

While the technology of these systems are identical to that featured in our Dock Lights, the Portable model is fully sealed against the elements, and features our protective coated steel cage included with the system. Also included is the securing strap to fasten the wire to any rail or cleat, as well as the fully sealed weight.

# WARNING:

If for any reason your system should cease to function, unplug the unit immediately as a safety precaution then call (941) 391-5846.

**Do NOT press the reset button...**

## Safety Disclaimer

We take every precaution to ensure that we are offering a safe and reliable product. Our lights include safety fuses, a built in GFI plug and are required to be plugged into a GFCI outlet at all times. Even with these safety features in place, we must insist that people do not swim around these lights while they are plugged in. This is true of any 110v underwater lighting system. While the lights are designed and tested to shut down if there is any interruption of the power supply, the possible risk of shock/injury/death is too great to take a chance. Please unplug the system(s) before entering the water.

The manufacturer/designer/seller of this product is not responsible for any injury/death/damage to property caused by the use of this product. Take any and all safety precautions when using this product. This system must be plugged into a UL Approved GFCI outlet. The purchaser agrees to the above by purchasing this system. If you do not agree to these terms, please call us to promptly return your system for a full refund.
