

## Why Vibrant Green?

- The Vibrant Green Series was developed for customers who wanted a brighter alternative to the our Classic Natural Green Series.
- The green bulb creates a more emerald green color on the service of the water.
- With the green illumination, the light is able to cut through murky water easier, creating a larger circle of light on the service.

## Before You Buy

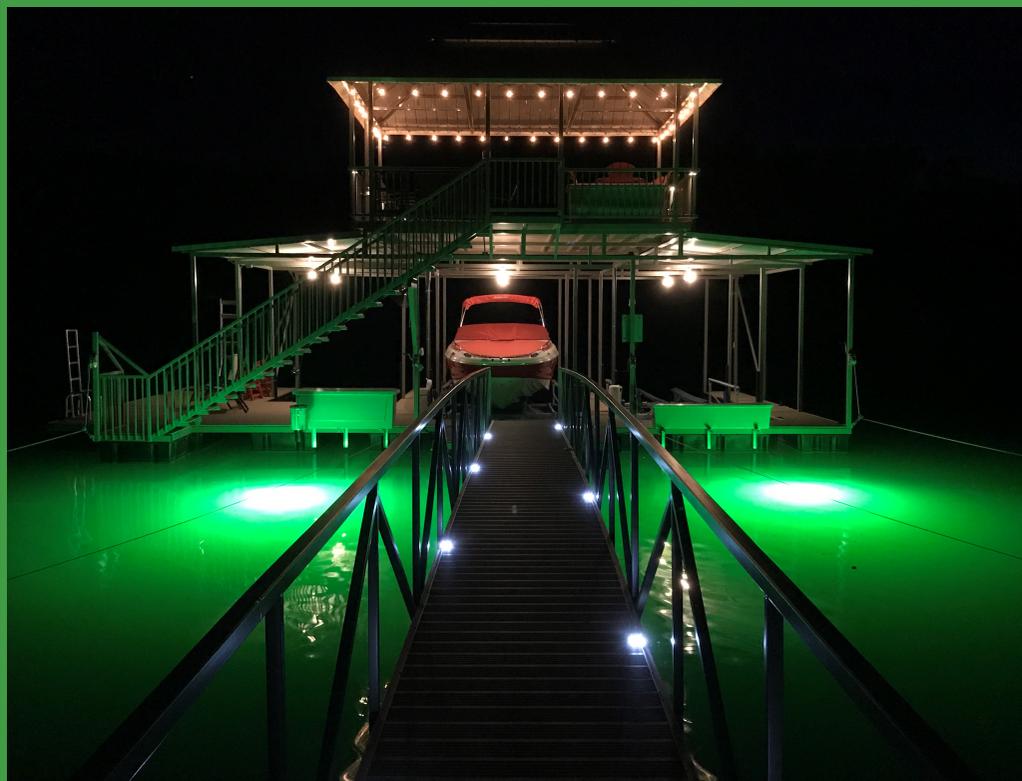

- Our Vibrant Green Series works great in any waterway, no matter the clarity!
- Even though the bulb illuminates a green glow, it still reflects off the particles in the water, which attract the bait fish and larger predators!

### Warning!

If for any reason the system should cease to function, disconnect the unit immediately as a safety precaution, then call 855-FISH-LIGHT.  
**DO NOT press the reset button on the GFCI plug.**

## Extend the Life of Your System

- Your system should run continuously each night for optimal results and self-cleaning. A minimum of eight hours per night is required to keep growth off the bulb.
- The bulbs must never be illuminated out of the water. They run the risk of overheating.
- Wire shield is the best way to protect against nicks in the wire caused by fish hooks or other aquatic life. Nicks in the wire are considered damage and not covered under the three-year manufacture warranty. You can purchase wire shield through our website.

## Safety Disclaimer

We take every precaution to ensure that we are offering a safe and reliable product. Our lights include a built-in GFCI plug and are required to be plugged into a GFCI outlet at all times. Even with these safety features in place, we must insist that you do not swim around these lights while they are plugged in. This is true with any 110 volt lighting system. While the lights are designed and tested to shut down if there is any interruption of the power supply, the possible risk of shock/ injury/death is too great to take a chance. Please unplug the system(s) before entering the water. The manufacture/designer/seller of this product is not responsible for any injury/death/damage to property caused by the use of this product. Take any and all safety precautions when using this product. This system must be plugged into a UL approved GFCI outlet. The purchaser agrees to the above by purchasing this system. If you do not agree to these terms, please call us promptly to return your system for a full refund.
