

Wire Shield

Wire shield is the best way to protect your light assembly from nicks or cuts in the wire.

These damages can occur from fish hooks, or from other marine life.

Wire shield is simply a heavy-duty hose that is split down the middle. It is then wrapped around the light assembly leading out to the bulb.

This hose creates a shielding around the wire adding an additional layer of protection.

Nicks and cuts are considered damages and are not covered under the manufacture warranty.

Many times, light assemblies are not damaged by the owners of the lights, but rather fishermen trolling the canals for these lights at late hours.

Taking preventative measures now, will protect your fish light for years to come!

Warning!

If for any reason the system should cease to function, disconnect the unit immediately as a safety precaution, then call 855-FISH-LIGHT.

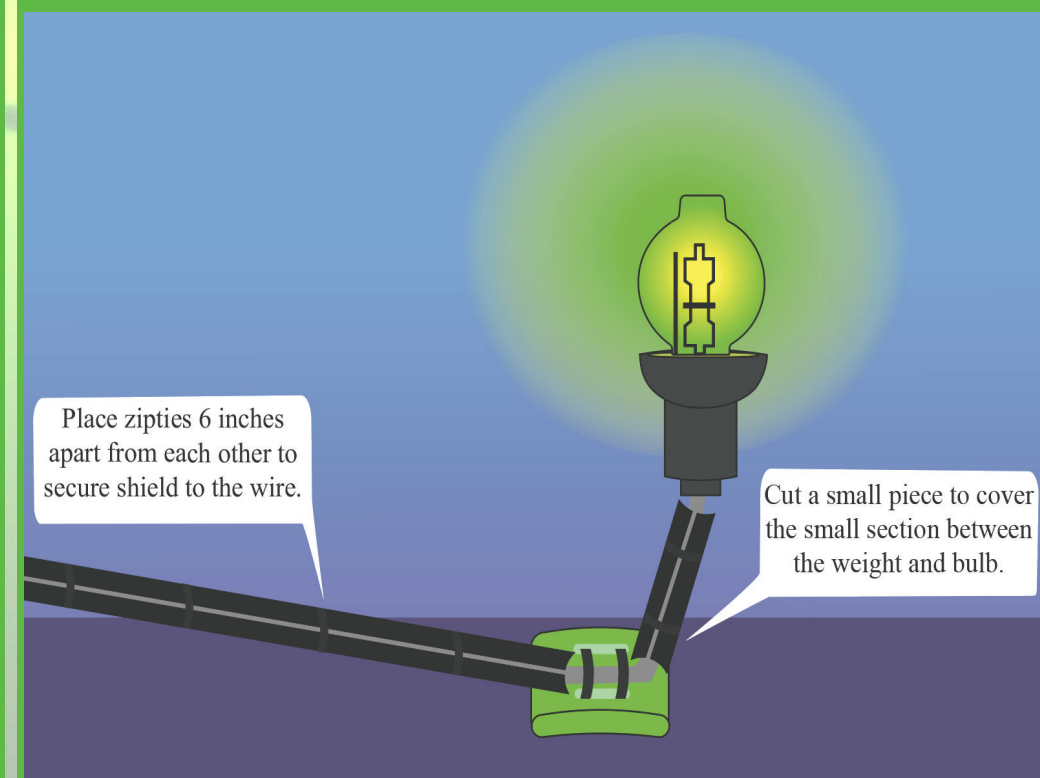

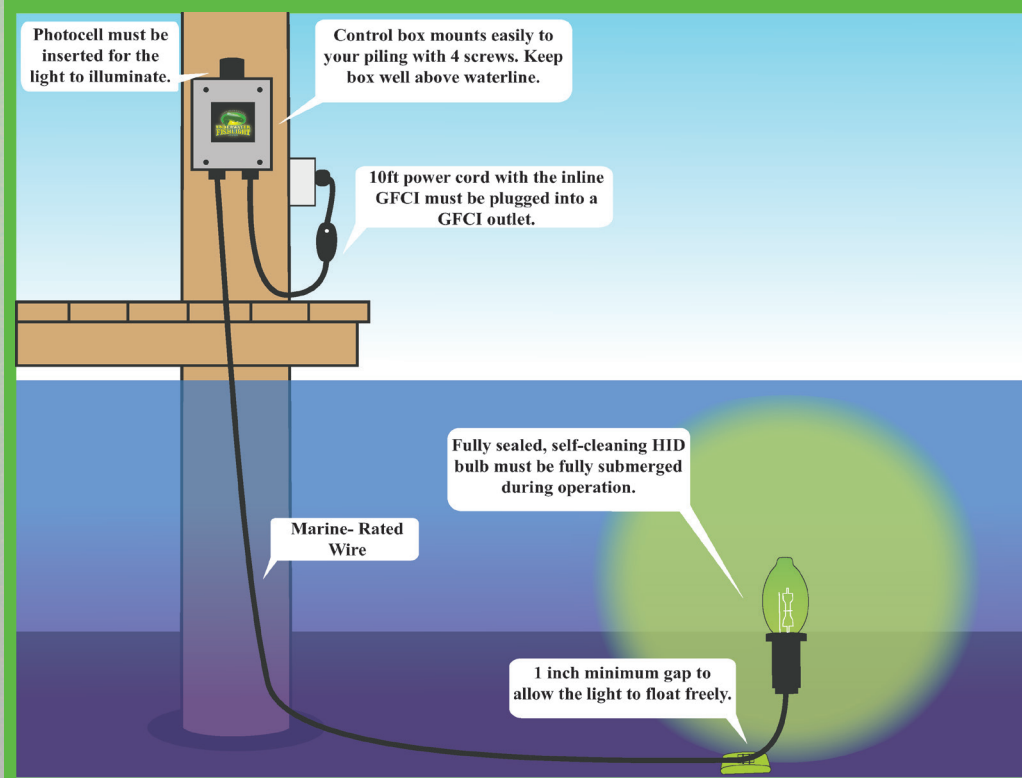

DO NOT press the reset button on the GFCI plug.

Warranty Claims

Damages are not covered under the manufacture warranty. Our three-year warranty covers any manufacture defects that may occur within the system for a full three years.

If you believe your system has an issue that is covered under the warranty, you must send in the defective part to our warehouse for inspection before it is replaced.

If the part is found to have a manufacture defect, it will immediately be replaced at no expense to the customer.

Thank you for your purchase!

We know you have many choices when it comes to underwater lighting, and we appreciate you choosing us!

What's included with a new system?

HID Light System including connected light assembly, control box, and GFCI plug

2 Zip Ties

5lb Weight

Photocell

Safety Disclaimer

We take every precaution to ensure that we are offering a safe and reliable product. Our lights include a built-in GFCI plug and are required to be plugged into a GFCI outlet at all times. Even with these safety features in place, we must insist that you do not swim around these lights while they are plugged in. This is true with any 110 volt lighting system. While the lights are designed and tested to shut down if there is any interruption of the power supply, the possible risk of shock/ injury/death is too great to take a chance. Please unplug the system(s) before entering the water. The manufacture/designer/seller of this product is not responsible for any injury/death/damage to property caused by the use of this product. Take any and all safety precautions when using this product. This system must be plugged into a UL approved GFCI outlet. The purchaser agrees to the above by purchasing this sytem. If you do not agree to these terms, please call us promptly to return your system for a full refund.
