

# Product Specifications

**LED Length:** 23 Inches

**Marine-Rated Wire Length:** 20 Feet

**Power Source:** Connects to 12 volt battery via Alligator clips. Cigarette plug adapter also available.

**Available Accessories:** Cigarette plug adapter, extra weights, mounting brackets, and more!

## Important Information

These 12 volt systems are not intended as a replacement for our HID Dock Light Systems. Keep in mind that because these lights do not produce heat, they are not self-cleaning. These lights are designed to be used for a limited period of time (8-10 hours maximum). The connections are NOT waterproof.

# The Most Reliable LED Fishing Lights on the Market

While our HID Dock Lights are still the brightest option, our LED lights offer a great choice for any outdoor enthusiast on the go!

Our Portable LED Light Systems also come with our three-year manufacture warranty, so you can fish with confidence for years to come. All of our customers are welcome to try any of our systems risk-free for sixty nights!

With over a decade of experience, and thousands of systems sold worldwide, we can truly say our lights are Fish Guaranteed!

# Available Accessories

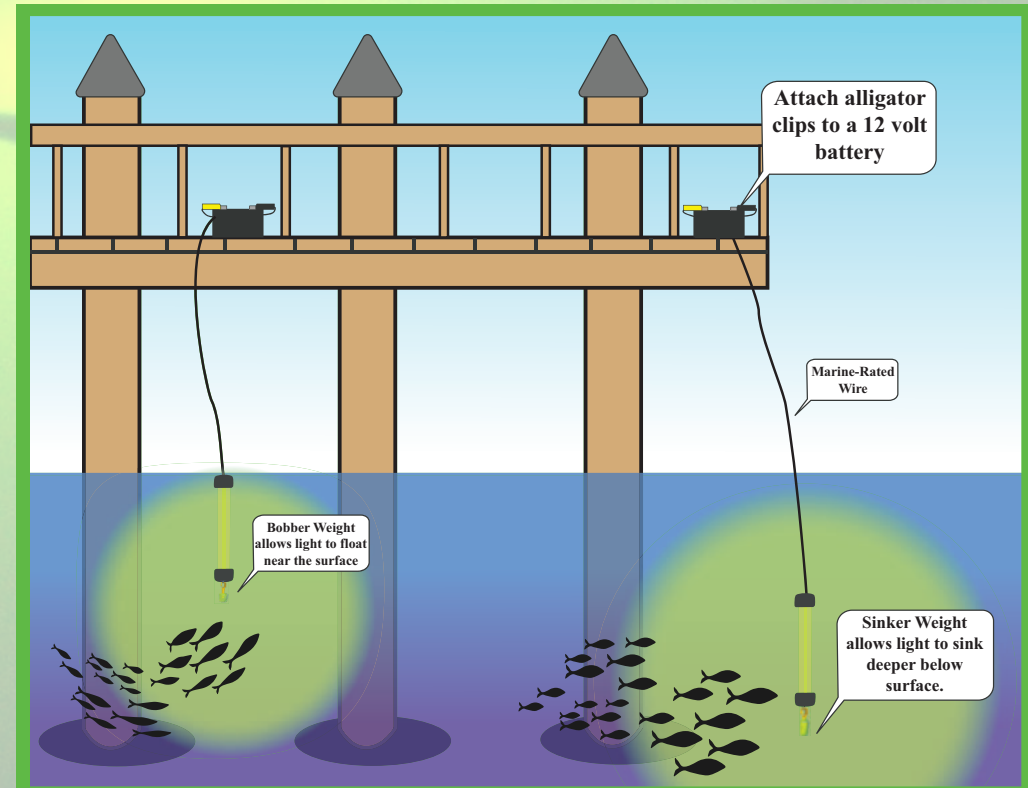

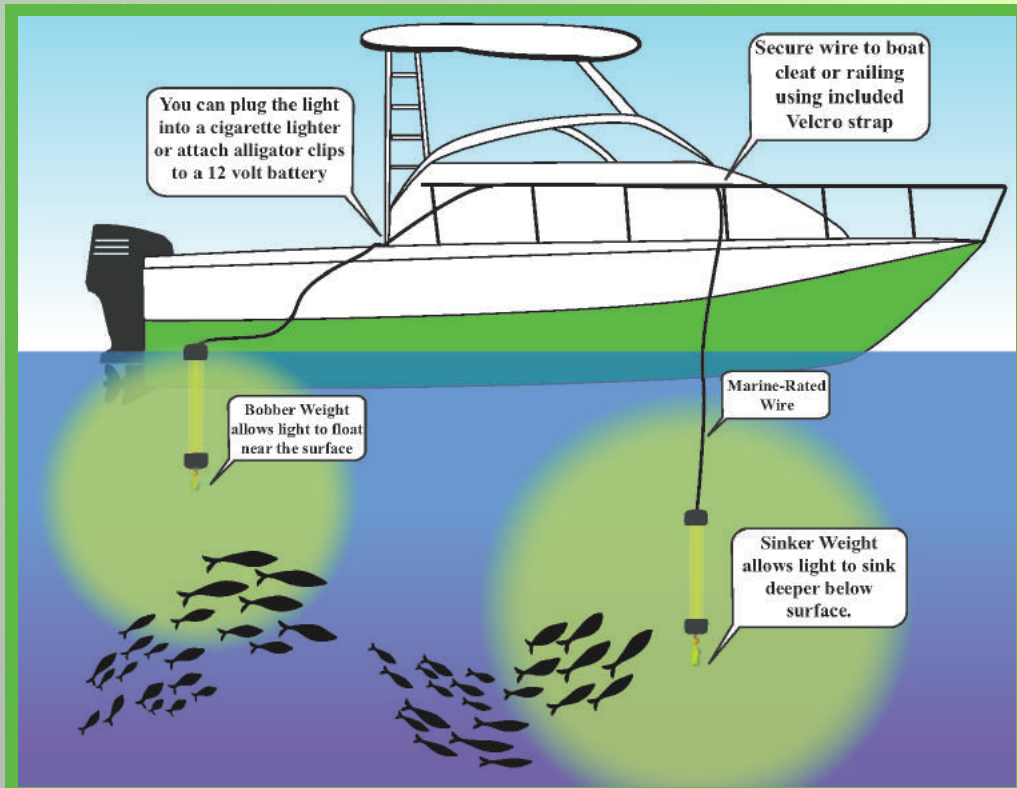

**Cigarette Plug Adapter:** Use this adapter to power your LED directly from a cigarette lighter in your car or boat!

**Extra Weights:** Our LED comes with two weights (bobber and sinker), but if you need more, they are available!

**Mounting Brackets:** This allows you to attach your LED to a boat, kayak, or board!

## Warning!

If for any reason the system should cease to function, disconnect the unit immediately as a safety precaution, then call 855-FISH-LIGHT. **DO NOT try to open and fix yourself. If the seal is broken, the warranty is void.**

**Thank you for your purchase!**

We know you have many choices when it comes to underwater lighting, and we appreciate you choosing us!

**What's in the box?**
