

Installation Instructions

1. Drill holes in the middle of the board marked by black dots. This is where you will mount the board to the dock.
2. Hold the board up to the post and drill screws into the post to mount the board.
3. Attach the control box to the board by pushing bolts through the mounting tabs on the control box.
4. Secure the bolts with nuts supplied.
5. Ensure the bolts are secure to the mounting tabs. Be careful not to over-tighten the bolts!

Why Use One?

Mounting plaques are a great way to safely attach your control box to your dock.

Some mounting locations are more narrow than the control boxes that come with the system.

These plaques allow the control boxes to be mounted on a wide range of docks.

Warning!

If for any reason the system should cease to function, disconnect the unit immediately as a safety precaution, then call 855-FISH-LIGHT.

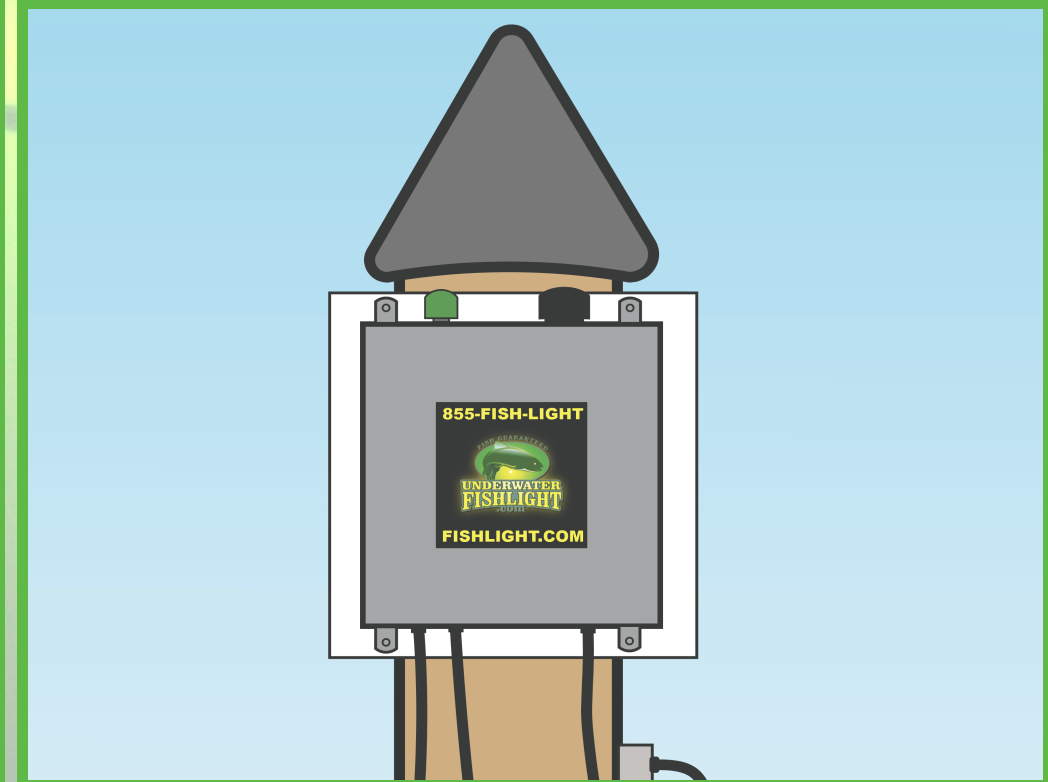

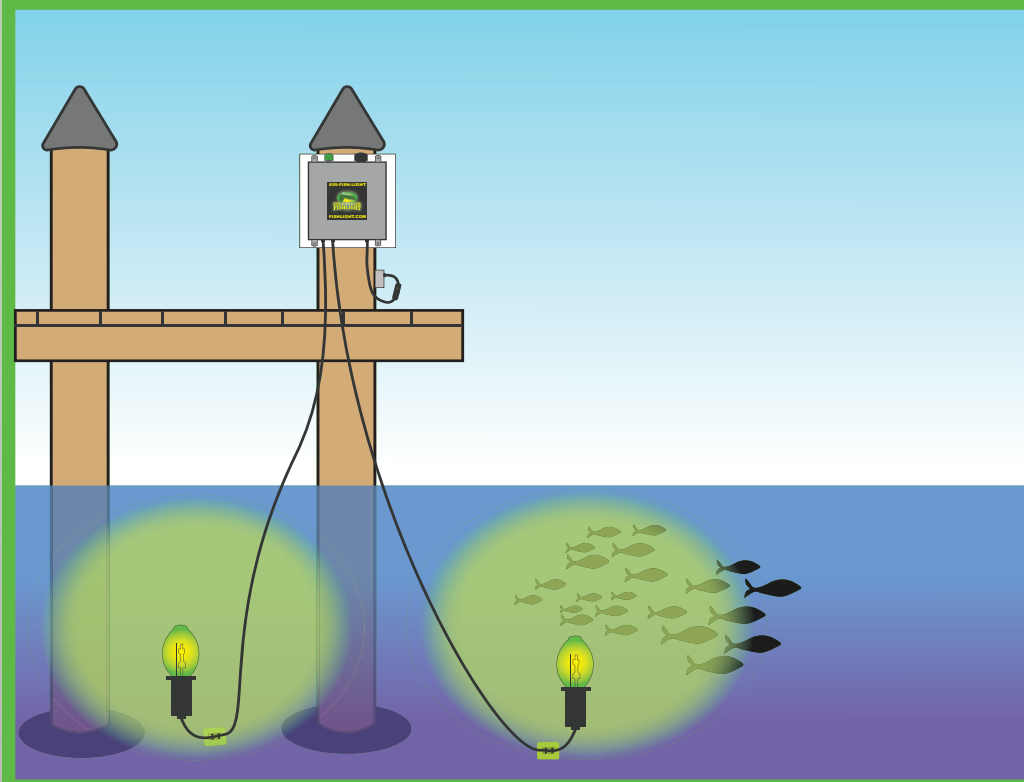

DO NOT press the reset button on the GFCI plug.

Extend the Life of Your System

Your system should run continuously each night for optimal results and self-cleaning. A minimum of eight hours per night is required to keep growth off the bulb.

The bulbs must never be illuminated out of the water. They run the risk of overheating.

Wire shield is the best way to protect against nicks in the wire caused by fish hooks or other aquatic life. Nicks in the wire are considered damage and not covered under the three-year manufacture warranty. You can purchase wire shield through our website.

Thank you for your purchase!

We know you have many choices when it comes to underwater lighting, and we appreciate you choosing us!

What's included with the mounting plaque?

Starboard Plaque

Mounting Hardware

Safety Disclaimer

We take every precaution to ensure that we are offering a safe and reliable product. Our lights include a built-in GFCI plug and are required to be plugged into a GFCI outlet at all times. Even with these safety features in place, we must insist that you do not swim around these lights while they are plugged in. This is true with any 110 volt lighting system. While the lights are designed and tested to shut down if there is any interruption of the power supply, the possible risk of shock/ injury/death is too great to take a chance. Please unplug the system(s) before entering the water. The manufacture/designer/seller of this product is not responsible for any injury/death/damage to property caused by the use of this product. Take any and all safety precautions when using this product. This system must be plugged into a UL approved GFCI outlet. The purchaser agrees to the above by purchasing this system. If you do not agree to these terms, please call us promptly to return your system for a full refund.
